

Automatic Paper Joggers With Pressing Roll

- ▮ Precisely jogged alignment of the sheets improves Cut-to-Print Registration quality considerably.
- ▮ Enables the jogger to double as a quality control workstation.
- ▮ Increases the efficiency of the cutting machine significantly because cutting can be continued while new material is prepared, and eliminates need to press air from pile using cutter clamp strokes.
- ▮ Cutting quality and accuracy is improved due to mechanized removal of air in pile before cutting.
- ▮ Four automatic table inclination angles on the right or left side are selectable with just one touch.
